

**STUDENT INTEREST FORM
INTERNSHIP PROFILE**

The research policy internship is a significant part of your educational plan. Your needs, interests, and career goals are considered in determining your internship. In an effort to provide rewarding and educationally enriching internships, many factors will be considered: prior educational experience, specialization interest, previous employment and life experience(s), and location concerns. Please note any additional information that you want taken into consideration in selecting your internship. Information from this form will be used as an aid in arranging the appropriate site for your policy research experience.

The School will designate organizations/agencies as appropriate internship sites based upon their ability to provide an educationally suitable setting that meets program requirements and student needs. Placements will be finalized in consultation with the student.

Please e-mail the completed form, along with your interest statement, to:

Dr. Azahara Palomeque: azaharap@upenn.edu
